

P05X series

ALL-IN-ONE PC POS

Model Explication

15" operator display
+9 digit VFD

15" operator display
+24" 128 VFD

15" operator display
+15" customer display

UNIQUE FUNCTIONS

- Apply professional Fanless industrial-control main board and low-power intel CPU in the host, run more stably and reliably.
- Adopt 15" bezel free capacitive touch screen, with elegant appearance and provides superb user experience. No need to press hard, ensuring long usage lifetime.
- Optional 10" and 15" colorful customer display, used for multimedia advertisement playing, in-store promotion and information publish etc.. Type of double screen will bring more value-added service and advertisement revenue.
- Optional thermal printer 2" without cutter, or 3" with cutter. Up to 150mm/s high print speed. Adopt unique slanting piercing paper sensor patent is with mechanism to replace paper-cutter easily without opening the printer cover, and with flexible black mark position function.
- With M1 prepaid management of the highest safety class, provide users with ISO14443A M1 card offline issuing mechanism of high safety class and chain management, instead of the online mode with high costs.
- Optional 45° downwards laser barcode scanner (eye protection) with patented magnetic sucker, able to take it down quickly to scan large commodities.
- Flexible module design concept, (un)install magcard reader, i-Button, scanner, WIFI, customer display and other module easily, satisfy different customers.

EXCELLENT FUNCTIONS

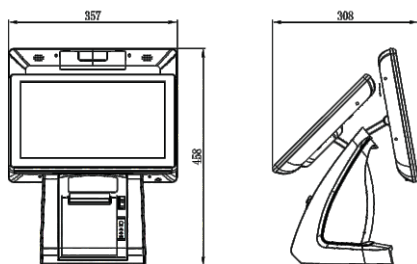

- Optional commercial front software for retails, convenience stores, restaurants, supermarkets, food plazas, boutique and so on, to access data of head office directly, establish chain network, and support online update.
- Optional 24*128 full dot-matrix VFD or 9 digital VFD customer display, able to display detailed consumption contents with adjustable angle ($\pm 180^\circ$).
- Operator display could be adjusted $30^\circ \sim 75^\circ$ by cashiers.
